

KPI List — GTA V Global Sales & Player Analytics

K1: Revenue Trend by Year

Analyze how global gross revenue has evolved year-over-year from launch (2013) through the most recent reporting period.

Goal: Identify which years drove the strongest growth or decline, and quantify the overall revenue trajectory.

K2: Country-wise Sales Performance

Compare units sold and gross revenue across countries to identify the strongest and weakest performing markets.

Goal: Determine which countries contribute most to global revenue and units sold.

K3: Platform & Sales Channel Impact

Compare units sold across gaming platforms (PC, PlayStation, Xbox generations) and between digital and physical sales channels.

Goal: Identify which platforms and channels drive the most volume, to guide platform support and storefront investment priorities.

K4: GTA Online Growth vs. Story Mode Engagement

Evaluate how GTA Online player counts have grown relative to Story Mode player counts over time.

Goal: Identify whether GTA Online engagement is growing at the expense of Story Mode, or whether both are growing together.

K5: Monetization Mix (DLC vs. Shark Card Revenue)

Analyze the relative contribution of DLC revenue and Shark Card (microtransaction) revenue across years.

Goal: Identify which monetization stream is the primary driver of GTA V's long-tail revenue.

K6: Revenue per Capita by GDP Tier

Segment countries into Low / Medium / High GDP tiers and analyze revenue generated per million people in each tier.

Goal: Understand how a country's economic strength relates to its per-capita spending on the game.

K7: Discount Depth vs. Refund Rate by Sale Event

Analyze how the average discount percentage offered during major sale events (Steam Summer Sale, Black Friday, Epic Mega Sale, etc.) relates to the average refund rate.

Goal: Identify whether deeper discounting is associated with higher refund rates, to inform future promotional strategy.
